EDUCATION

Honours Computer Science and Management (B.Sci), Wilfrid Laurier University

September 2022 - Dec 2026
Waterloo, ON

EXPERIENCE

Solutions Engineer / Technical Consultant (Contract)

April 2024 - Present

Self-Employed

Vaughan, ON

- Led technical discovery sessions with clients to understand business requirements and translate them into scalable system designs.
- Designed and delivered end-to-end solutions, including backend services, APIs, and frontend interfaces, enabling successful deployment across 5+ client environments.
- Acted as the primary technical point of contact, explaining trade-offs, system behavior, and implementation details to non-technical stakeholders.
- Supported post-deployment troubleshooting, performance optimization, and iterative feature improvements based on client feedback.

Junior Solutions Architect / Engineer

June 2025 - August 2025

LaunchPath Inc.

Vaughan, ON

- Owned solution architecture for a biosensor analytics platform, translating product and business requirements into technical specifications.
- Produced C4 diagrams, API contracts, and integration plans to guide engineering implementation.
- Coordinated across frontend and backend teams during Agile sprints, ensuring alignment between design intent and delivered functionality.
- Presented technical designs and sprint outcomes to stakeholders, supporting alignment between business goals and technical implementation.

AI Solutions Engineer

July 2025 - Present

MCG - Digital Assetization Company

Vaughan, ON

- Integrated AI-driven capabilities into customer-facing applications, balancing performance, usability, and system reliability.
- Collaborated with product, frontend, and engineering teams to align AI system behavior with business and user requirements.
- Exposed AI functionality via REST APIs and supported integration into interactive user experiences.
- Assisted in evaluating and recommending technical approaches based on accuracy, latency, and operational constraints.
- Authored system architecture and object-oriented design documentation (component diagrams, data flows, API boundaries) to support implementation, onboarding, and future scalability.

Technical Research Assistant (Systems Validation)

September 2025 - Present

Wilfrid Laurier University

Waterloo, ON

- Designed automated validation workflows and produced structured technical documentation to analyze system behavior, identify failure cases, and communicate findings to stakeholders.

PROJECTS

AI WhatsApp Summarization Platform

- Designed and delivered a production AI solution used by 200+ daily active users, from requirements gathering through deployment.
- Implemented backend services, APIs, and deployment workflows to support reliable operation across user environments.
- Worked directly with users to gather feedback, refine requirements, and guide iterative improvements.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** - In Progress

SKILLS

Languages & Frameworks: Python, JavaScript / TypeScript, SQL, Node.js, React / Next.js

Platforms & Tools: AWS (Lambda, S3), Vercel, Docker, Git, REST APIs

Databases: PostgreSQL, MySQL, MongoDB

Concepts: Cloud-native architectures, system integration, scalability, reliability, security considerations
